Weak Prompt : Test the cart functionality

Response :

To test Cart functionality in an e-commerce application, you should verify that users can successfully add, modify, and purchase items while the cart behaves correctly in different scenarios.

Here are comprehensive functional test cases:

Test Case ID	Test Scenario	Expected Result
CART_001	Add a single product to the cart	Product is added successfully.

Test Case ID	Test Scenario	Expected Result
CART_002	Add multiple different products	All selected products appear in the cart.
CART_003	Add the same product multiple times	Quantity increases or duplicate item is handled as per requirements.
CART_004	Add product with different variants (size/color)	Correct variant is added.
CART_005	Verify cart icon count	Cart count updates correctly.
CART_006	Open cart after adding products	All added items are displayed correctly.
CART_007	Increase product quantity	Quantity and total price update correctly.
CART_008	Decrease product quantity	Quantity decreases and total updates.
CART_009	Reduce quantity to zero	Product is removed or minimum quantity validation is displayed.
CART_010	Remove a product from cart	Product is removed successfully.
CART_011	Remove all products	Cart becomes empty and displays appropriate message.
CART_012	Verify subtotal calculation	Subtotal equals sum of all product prices × quantity.
CART_013	Verify tax calculation	Tax is calculated correctly.
CART_014	Verify shipping charges	Shipping is calculated according to business rules.
CART_015	Verify grand total	Grand total = Subtotal + Tax + Shipping – Discount.
CART_016	Apply valid coupon	Discount is applied correctly.
CART_017	Apply invalid coupon	Appropriate error message is displayed.

Test Case ID	Test Scenario	Expected Result
CART_018	Apply expired coupon	Coupon is rejected with correct message.
CART_019	Remove applied coupon	Discount is removed and total recalculated.
CART_020	Continue shopping	User is redirected back to product listing.
CART_021	Proceed to checkout	User is navigated to checkout page.
CART_022	Verify stock availability	Out-of-stock products cannot be purchased.
CART_023	Quantity exceeds stock	Appropriate validation message is displayed.
CART_024	Refresh cart page	Cart data persists correctly.
CART_025	Logout and login again	Cart is retained (if business rule supports persistence).
CART_026	Guest user adds items	Guest cart functions correctly.
CART_027	Guest logs in	Guest cart merges correctly with user cart (if applicable).
CART_028	Session timeout	Cart behaves according to application requirements.
CART_029	Browser Back/Forward navigation	Cart data remains consistent.
CART_030	Verify cart on different browsers/devices	Cart behaves consistently across supported platforms.

Negative Test Cases

- Add an unavailable product to the cart.
- Enter a quantity greater than the available stock.
- Enter invalid quantity values (0, negative, alphabets, special characters).
- Apply an invalid, expired, or already-used coupon.
- Remove an item while the network connection is interrupted.

- Attempt checkout with an empty cart.

UI Test Cases

- Product image, name, SKU, price, and quantity are displayed correctly.
- Remove, Update, and Checkout buttons are visible and enabled.
- Currency symbol is displayed correctly.
- Long product names are displayed properly without UI issues.
- Cart is responsive on desktop, tablet, and mobile devices.

Performance Test Cases

- Add 100+ items to the cart and verify performance.
- Verify cart page load time under heavy data.
- Verify concurrent users updating carts simultaneously.

Security Test Cases

- Prevent price manipulation through browser developer tools.
- Validate coupon codes securely on the server.
- Prevent unauthorized access to another user's cart.
- Protect against SQL Injection and Cross-Site Scripting (XSS) in coupon or quantity input fields.

These test cases provide broad coverage for the cart functionality and are suitable as a baseline for manual testing or for converting into automation scripts.

ICEPOT Response:

ID	Description	Pre-Requisite	Steps to Execute	Expected Results
001	Validate that a user can add an item to the shopping cart successfully.	1. Login to Walmart application in the test environment. 2. Item is available in stock.	1. Search or browse for an item. 2. Click Add to Cart. 3. Observe the confirmation message. 4. Click View Cart.	1. The item is added successfully to the cart. 2. "Added to cart" message is displayed. 3. The selected item is listed in the cart.

ID	Description	Pre-Requisite	Steps to Execute	Expected Results
002	Validate that multiple items can be added to the shopping cart without any limit.	1. Login to Walmart application.2. Multiple items are available in stock.	1. Select multiple items.2. Click Add to Cart for each item.3. Open View Cart.	1. All selected items are added successfully.2. All items are displayed in the cart.3. No restriction is imposed on the number of items added to the cart.
003	Validate that the selected items are listed correctly in the cart after clicking Add to Cart.	1. Login to Walmart application.2. Multiple items are available.	1. Add multiple items to the cart.2. Click View Cart.	1. Every selected item is listed in the cart.2. Item details such as name, quantity and price are displayed correctly.
004	Validate that a user can update the quantity of an item in the cart.	1. Login to Walmart application.2. At least one item is present in the cart.	1. Open View Cart.2. Increase or decrease the item quantity.3. Save the changes if applicable.	1. Cart is updated successfully.2. Updated quantity is displayed.3. Price calculation is updated accordingly.
005	Validate that a user can remove an item from the shopping cart.	1. Login to Walmart application.2. At least one item is present in the cart.	1. Open View Cart.2. Click Remove for an item.	1. Selected item is removed successfully.2. Remaining items continue to be displayed correctly.3. Price calculation is updated accordingly.
006	Validate that the cart list displays all added items correctly.	1. Login to Walmart application.2. Multiple items are added to the cart.	1. Click View Cart.	1. All added items are displayed correctly in the cart.2. Item details are accurate.

ID	Description	Pre-Requisite	Steps to Execute	Expected Results
007	Validate price calculation for all items in the shopping cart.	1. Login to Walmart application.2. Multiple items are added to the cart.	1. Add multiple items.2. Open View Cart.3. Verify item prices, subtotal and total amount.	1. Price calculation is displayed on the cart list screen.2. Total amount equals the sum of item prices after applicable calculations.
008	Validate that coupon and discount details are displayed on the cart list screen.	1. Login to Walmart application.2. Eligible items are added to the cart.	1. Add eligible items.2. Open View Cart.	1. Applicable coupon and discount details are displayed.2. Discount amount is reflected correctly in the total price.
009	Validate that an out-of-stock item cannot be added to the shopping cart.	1. Login to Walmart application.2. An item is marked as out of stock.	1. Search for the out-of-stock item.2. Click Add to Cart.	1. Item is not added to the cart.2. "Out of stock" message is displayed.
010	Validate that payment mode options are displayed on the cart list screen.	1. Login to Walmart application.2. At least one item is added to the cart.	1. Click View Cart.2. Proceed to payment.	1. Available payment mode options are displayed successfully.
011	Validate successful payment for items present in the shopping cart.	1. Login to Walmart application.2. Items are present in the cart.	1. Click View Cart.2. Verify price calculation.3. Verify coupon/discount details.4. Select a valid payment mode.5. Click Pay.	1. Payment is completed successfully.2. "Payment is Successful" message is displayed.3. Order is created successfully.
012	Validate unsuccessful payment for	1. Login to Walmart application.2.	1. Click View Cart.2. Select a payment mode.3. Simulate payment failure or	1. Payment is not completed.2. "Payment Failed" message is

ID	Description	Pre-Requisite	Steps to Execute	Expected Results
	items present in the shopping cart.	Items are present in the cart.	use invalid payment details.4. Click Pay.	displayed.3. Items remain available in the cart.
013	Validate that cart updates the total amount after adding additional items.	1. Login to Walmart application.2. At least one item is already present in the cart.	1. Add additional items.2. Open View Cart.	1. Newly added items are displayed.2. Total price is recalculated correctly.3. Applicable discounts are updated.
014	Validate that cart updates correctly after removing one of multiple items.	1. Login to Walmart application.2. Multiple items are present in the cart.	1. Remove one item.2. Refresh or reopen View Cart.	1. Removed item is no longer displayed.2. Remaining items are displayed correctly.3. Total price and discounts are recalculated correctly.
015	Validate end-to-end shopping cart functionality from adding items to successful payment.	1. Login to Walmart application in the test environment.2. Items are available in stock.	1. Select multiple items.2. Click Add to Cart.3. Verify "Added to cart" message.4. Click View Cart.5. Verify selected items are listed.6. Verify price calculation.7. Verify coupon/discount details.8. Select a payment mode.9. Click Pay.	1. Selected items are listed in the cart.2. Price calculation and discounts are displayed correctly.3. Payment options are displayed.4. Payment completes successfully.5. "Payment is Successful" message is displayed.
