Weak Prompt_Response:

Sure! Search functionality is working from my side.

If you're trying to test a specific type of search, here are a few examples you can try:

* **Current information:** "Latest AI news"

* **Weather:** "What's the weather in Chennai today?"

* **Sports:** "India cricket match score"

* **Local places:** "Coffee shops near me"

* **Products:** "Best 32 GB USB 3.2 pendrive"

Or simply tell me what you'd like me to search for, and I'll look it up.

ICEPOT Prompt_Response

ID	Description	Pre-Requisite	Steps to Execute	Expected Results
TC_PP_SRC H_001	Validate that Practitioner search is executed only after entering at least one Search Criteria	1. Login to the new Provider Profiles application in Test environment.2. Navigate to Practitioner Search page.	1. Leave all Search Criteria fields blank.2. Click Search.3. Enter a valid value in any one Search Criteria field.4. Click Search again.	1. System should not execute search when all Search Criteria fields are blank and should display an appropriate validation message.2. Search should execute only after valid Search Criteria is entered.
TC_PP_SRC H_002	Validate search using a single Search Criteria field	1. User is logged in.2. Practitioner Search page is displayed.	1. Enter a valid value in one Search Criteria field.2. Click Search.	Search results should display only the practitioners matching the entered Search Criteria.
TC_PP_SRC H_003	Validate search using multiple Search Criteria fields	1. User is logged in.2. Practitioner Search page is displayed.	1. Enter valid values in multiple Search Criteria fields.2. Click Search.	Search results should display only records satisfying all selected Search Criteria combinations.
TC_PP_SRC H_004	Validate search using all available Search Criteria fields	1. User is logged in.2. Practitioner Search page is displayed.	1. Enter valid values in all Search Criteria fields.2. Click Search.	Search results should display practitioners matching all entered Search Criteria values.
TC_PP_SRC H_005	Validate search result accuracy for different Search Criteria combinations	1. User is logged in.2. Test data exists for different Search Criteria combinations.	1. Execute multiple searches using different combinations of Search Criteria.2. Compare returned records with expected test data.	Search results should accurately match each Search Criteria combination entered. No unrelated records

				should be displayed.
TC_PP_SRC H_006	Validate Reset button functionality	1. User is logged in.2. Practitioner Search page is displayed.	1. Enter values in multiple Search Criteria fields.2. Click Reset.	All Search Criteria fields should be cleared and reset to their default state.
TC_PP_SRC H_007	Validate Search Results table columns	1. User is logged in.2. Search returns records.	1. Enter valid Search Criteria.2. Click Search.	Search results should be displayed in a tabular format with all configured columns populated correctly.
